Introduction

The purpose of this document is to outline the test plan for the Productivity Suit website. The test plan defines the strategy, scope, objectives, resources, test deliverables, and risks associated with testing to ensure the quality and reliability of the website before release.

AUT: <https://productivity-suit.vercel.app/index.html>

Objective

The primary objective of this test plan is to verify the functionality, performance, usability, security, and compatibility of the Productivity Suit website. The goal is to identify defects, ensure compliance with requirements, and confirm that the website meets user expectations.

Scope

The testing will cover all aspects of the website, including but not limited to:

- Functional testing of core features
- UI/UX consistency and accessibility
- Performance testing under different load conditions
- Security testing to prevent vulnerabilities
- Compatibility testing across various browsers and devices
- Integration testing with third-party tools or APIs
- Regression testing after updates

Testable Features

- User authentication (login, registration, logout, password reset)
- Dashboard functionality
- Task management features (create, update, delete tasks)
- Collaboration tools (shared tasks, team management)
- File uploads and downloads
- Notification system
- Data synchronization across sessions
- Responsiveness on different screen sizes

\

Testing Approach

➤ **Testing Types :**

- Functional Testing
- UI Testing
- Usability Testing
- Regression Testing
- Performance Testing

➤ **Testing Methodologies:**

- Black Box Testing
- White Box Testing
- Load & Stress Testing
- Exploratory Testing

➤ **Testing Environment:**

- QA Environment

➤ **Operating System:**

- Windows 11 and above
- Browser: Chrome, Firefox

Test Environment

- **Hardware Requirements:** Desktop, laptop, tablet, and mobile devices
- **Software Requirements:** Windows, macOS, iOS, Android
- **Browsers:** Chrome, Firefox, Edge, Safari
- **Network:** 4G, 5G, broadband internet
- **Test Data:** User credentials, sample tasks, uploaded file

Roles and Responsibilities

Roles	Responsibilities
Test Manager	✓ Oversees testing strategy ✓ Manages team ✓ Reports progress
Test Engineer	✓ Execute test cases ✓ Report defects ✓ Conduct retesting
Developer	✓ Fix defects and provide technical support for testing
Business Analyst	✓ Ensures requirements are met in testing
Project Manager	✓ Ensures testing aligns with project timelines

Test Schedule

Following is the test schedule planned for the subject:

Task	Start Date	End Date
Test Plan Creation	01-Apr-2025	05-Apr-2025
Test Scenario Creation	01-Apr-2025	05-Apr-2025
Test Case Creation	01-Apr-2025	05-Apr-2025
Test Case Execution	01-Apr-2025	05-Apr-2025
Bug Report	01-Apr-2025	05-Apr-2025
Summery Report	01-Apr-2025	05-Apr-2025

Test Deliverables

Deliverable	Description	Completion Date
Test Plan	Outlines the testing approach, strategies, and scope for the Amazon web application.	05-Apr-2025
Test Scenario	Test Scenarios created for all mentioned objectives	05-Apr-2025
Test Case	Test Cases created for both functional testing and compatibility testing	05-Apr-2025
Bug Report	Detailed description of the defects identified in different versions of application.	05-Apr-2025
Summary Report	Detailed overview of the status of all test cases conducted, along with suggestions for improvement.	05-Apr-2025

Entry and Exit Criteria

The below are the entry and exit criteria for every phase of Software Testing Life Cycle:

Requirement Analysis

- **Entry Criteria:**
 - Receives the Requirement documents of the project includes what functions need to be tested and how the software should behave.
- **Exit Criteria:**
 - Tester should thoroughly explore and understand each requirement listed in the documents. Any doubts or uncertainties regarding the requirements should be addressed and clarified.

Test Planning

- **Entry Criteria:**
 - Testable Requirements derived from the given Requirements documents. Test Plan document includes the Test Strategy, which provides a high-level overview of how testing will be conducted.
- **Exit Criteria:**
 - Test Plan is signed-off by the Client.

Test Designing

- **Entry Criteria:**
 - The Test Plan document needs to be reviewed and approved by the client and then Test Plan Document is signed-off by the Client
- **Exit Criteria:**
 - Test Scenarios and Test Cases prepared, reviewed, and signed-off by Client.

Test Execution

- **Entry Criteria:**
 - Test Scenarios and Test Cases reviewed and approved by the client. Application is ready for further Testing
- **Exit Criteria:**
 - Test Case Reports and Defect Reports ready

Test Closure

- **Entry Criteria:**
 - Test Case Reports and Defect Reports are ready
- **Exit Criteria:**
 - Test Summary Reports, it overviews of the entire testing process

Tools

The following are the list of Tools we will be using in this Project:

- X mind map Tool
- Microsoft Excel
- Microsoft Word
- Slack – collaboration

Risk and Mitigation Plans

Risk	Mitigation Plan
Unclear requirements	Regular communication with stakeholders
Test environment issues	Early setup and continuous monitoring
High defect leakage	Implement rigorous regression testing
Performance issues	Conduct performance testing before deployment
Security issues	Perform penetration testing and code reviews

Approvals

Below are the documents required for Client Approval :

- Test Plan
- Test Scenarios
- Reports

Testing will only continue to the next steps once these approvals are done.

Mind Map

Presented with X-Mind
